ANAS ATTA

Full Stack Developer | Laravel, React, Next.js, Python
anasatta048@gmail.com | 03322665959 | Gujranwala, Pakistan | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with close to two years of experience shipping production web applications with Laravel, PHP, React and MySQL. Has built booking and quote engines, ERP/POS and HR systems, a UK and US business directory, Google API integrations, WordPress customisations, and Python/Chrome-extension scrapers. Comfortable owning a feature from database schema to UI to Linux deployment (Docker, SSH, cPanel), and uses Claude Code daily for AI-assisted development.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, SQL, C++
Frameworks and Libraries: Laravel, Livewire, Inertia.js, React.js, Next.js, Tailwind CSS, Alpine.js, Vite, Blade, WordPress (custom plugins, customisation)
Backend and APIs: REST API design, Laravel Sanctum, queues and jobs, middleware, Google OAuth and Google APIs, payment integrations, PHPUnit/Pest
Web Scraping and Automation: Python (Requests, BeautifulSoup), Playwright, Puppeteer, Chrome Extensions (Manifest V3), Excel/CSV data pipelines
Databases: MySQL (schema design, indexing, query optimisation)
DevOps and Tools: Docker (Dockerfiles), Ubuntu/Linux deployment, SSH, cPanel, Git, GitHub, VS Code
AI Tools: Claude, Claude Code (AI-assisted development)
Core Concepts: OOP, Data Structures and Algorithms, MVC, RESTful API design, database design, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Full Stack Developer | BrandixSoft | *March 2026 – Present*
- Shipped a UK and US service directory platform (Talk to Trader) end to end on one Laravel codebase: listings, reviews, plans and per-location SEO pages.
- Built a Google My Business manager with Google OAuth, location insights and metric charts using Laravel, React and Inertia.js.
- Developed and maintained an internal HRM system covering attendance, payroll, hiring and role-based permissions.
- Maintained and updated the company's internal CRM platform: bug fixes, updates and enhancements.
- Designed and evolved production MySQL schemas; tuned WordPress plugins and customised WordPress sites for performance.
- Added rate limiting and throttling after bot traffic took a live site down, restoring stability for real users.
- Deployed applications on Linux servers and cPanel hosting.

Laravel Developer | Bluehorn Technologies, Lahore | *August 2025 – February 2026*
- Owned Laravel 10/11 web applications from database schema to UI; built RESTful APIs and third-party integrations.
- Implemented custom middleware and reusable components; profiled and cut down slow request paths.
- Used Git and GitHub for version control and collaboration.

Laravel Developer | Ifinity Hub, Gujranwala | *August 2024 – February 2025*
- Built dynamic Laravel 10/11 web applications and RESTful APIs with custom middleware and reusable components.
- Managed version control with Git and reviewed code via GitHub.

PROJECTS

Talk to Trader (UK + US) | *Laravel 12, Livewire, MySQL*
- Service directory for two markets from one codebase: business listings, service areas, hours, media, FAQs, reviews, plans and per-location SEO content.

GMB Manager | *Laravel 12, React, Inertia.js, Sanctum*
- Google OAuth per account; pulls location insights and renders metric charts in a React UI.

HRM System (Brandix Stack) | *Laravel 12, Bootstrap, DataTables*
- Employees, attendance, payroll and incentives, candidates and interviews, holidays, roles and permissions in one internal tool.

Brandix Stack CRM (internal) | *Internal platform*
- Internal CRM and project-management platform with role-based panels for admin, client and employee. Maintained it with bug fixes, updates and enhancements.

Azark POS / E-commerce | *Laravel, multi-branch*

- Barcode billing, multi-payment checkout, real-time stock, purchase/sales and P&L reports, cashbook and party ledger, role-based branch access, plus a branded storefront with coupons and delivery zones.

Dreamelect Logistics | *Dispatch and accounting portal*

- Loads from booking to payment, drivers, one-click PDF invoices and books in one portal.

Siddique Sons Distributors | *Distribution management system*

- Purchases, batch and expiry stock, fast billing and invoicing, automatic ledgers and recovery tracking.

DirectWayCars | *PHP, MySQL, SumUp*

- UK airport-transfer booking site with mileage-based fare calculator, vehicle classes, corporate booking, customer accounts, card payments and booking admin.

123oil Quote Engine | *Laravel 12, Blade, MySQL*

- Heating-oil marketplace with instant postal-code pricing by oil type, tanker size, region and VAT, plus an admin back office.

Florenza Luxury Flowers | *Online store*

- Online flower store with custom recipe-based software for managing arrangement recipes.

BCR Publishing | *WordPress*

- Customised the WordPress site of a receivables-finance publisher (events, publications, news).

GMB Profile Scraper | *Chrome Extension (Manifest V3), JavaScript*

- Extracts Google Maps business profiles to formatted Excel files with keyword and city search, auto-scroll and per-profile extraction; no server or paid API.

Meta Ad Scraper | *Chrome Extension (Manifest V3), JavaScript*

- Collects ad creatives and metadata from the Meta (Facebook) Ad Library for competitor and market research.

Google Rank Tracker | *Python, Excel*

- Takes keywords, target URLs and locations from an Excel file and reports each keyword's Google position (top 100) as seen from that location, down to borough level, without paid APIs.

Directory Crawler | *Python, CSV*

- Crawls a shared UK construction directory spanning four domains in a single pass and outputs a de-duplicated CSV per domain.

EDUCATION

University of the Punjab — BS in Computer Science *2021 – 2025* | *CGPA: 3.51*
Relevant courses: OOP, Operating Systems, Data Structures and Algorithms, Computer Networks, Software Engineering, Database Systems.
Punjab College, Gujranwala — F.Sc Pre-Medical *2019 – 2021*
